How to Install Datamaxx Version 7
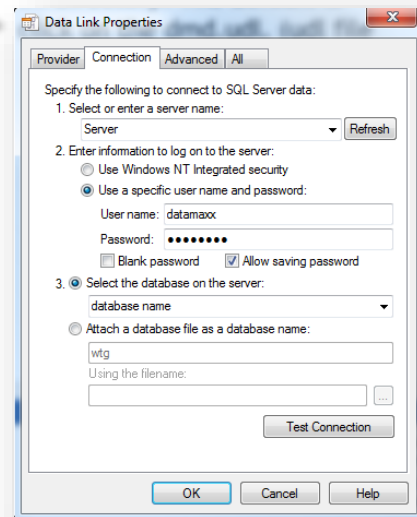

Install Instructions:

1. Click on this link, download the app and save it on locally on your PC.
   http://data-maxx.net/download/DM7/SetupDM7-Latest-Full.exe

2. Choose all the default settings unless you desire to install it elsewhere on your PC.

3. Make sure to install the Crystal Reports Runtime that follows the Datamaxx Install

4. After it has been fully installed browse to the installation directory. The default is C:\Program Files (x86)\DataMaxx\Datamaxx v7. Double click on the dmd.udl. (udl file extension may be hidden)

5. Put in your server credentials like this
   a. You can use Windows Integrated Security if that is setup on the sql server
   b. Check with your datamaxx rep for a user name and pw.
   c. Click OK

6. If you want to use barcode printing. Install this font on your PC http://data-maxx.net/download/v100025_.ttf

7. You should now be able to open Datamaxx from the shortcut on your desktop or start menu.

Go ahead and get started.
