- Timekeeping at individual PC workstations

- Job tracking at individual workstations

- A central kiosk for group timekeeping

- Remote employee's workstations on laptops, etc.

Up-to-the-minute Reporting

In PCMaxx workstation environments, employee data flows "real time" over your network letting you instantly see individual activity, departmental performance, and labor cost analysis by job. Off-site data is sent via the DataMaxx web services sync routine and can be performed at regularly scheduled times.

With Data-Maxx, you can add "pay" or "bill" rates to employees, departments or jobs to easily provide reports for cost justification or analysis. Also, run management reports at any time, such as Who's In, Who's Not In, Exceptions, Approaching Overtime, Schedule Variance, Job Detail and Summary, Department Detail and Summary, and more.

Historical data is readily available in Data-Maxx so all reports can be run for a quarter-by-quarter analysis. It is easy to obtain an employee's total work record or cost of a project
