

Keep Track of your business from wherever you do business.

Let Data:Maxx automate your inventory management...from anywhere.

Data:Maxx Inventory™

How would your company benefit if you could easily and accurately manage the equipment and supplies that are so vital to the profitability of your business? What if you could: *Accurately track the consumable material counts used at your job sites? Know the location of each piece of equipment, when it left the shop or warehouse, and who is responsible for it? Manage your inventory so that costs are kept in check yet materials are always available? Help your supervisors spend more time at the job site and less time doing paperwork? What if you could do all this and more, from the field or the warehouse, as easily as scanning a bar code?.* With Data-Maxx, you can.

A Data-Maxx system helps companies large or small automate the critical job of collecting inventory and equipment usage. Using the latest technology in bar code scanning and mobile computing, Data-Maxx offers a convenient choice of data collection devices. Use rugged handheld devices, to easily collect

data that can be uploaded to your accounting system from just about anywhere. And, Data-Maxx integrates your information with over 100 payroll and accounting packages, streamlining paperwork and eliminating manual errors.

Data-Maxx Inventory lets you:

- ◆ Automatically import items, jobs, and cost codes from your accounting system
- ◆ Create bar codes for all your inventory items using labels, paper for inventory notebook scans, or PVC cards
- ◆ Enter data via bar code scanning or keypad input depending on the capabilities of your data collection device
- ◆ Scan or input physical material counts
