

Keep Track of your business from wherever you do business.

Whether you are billing by the hour, by the job, or tracking complex projects in multiple locations for a large enterprise, managing the time and labor resources within your company are critical tasks. You need to implement controls to gain accountability, increase productivity, and maintain profits however; you need real labor statistics in order to make decisions. Now, Data-Maxx brings you an easy cost-effective way to collect the time and labor data that you need from your office, jobsite, or wherever you do business PCMaxx™.

Let Data:Maxx turn your network into a powerful time-tracking solution

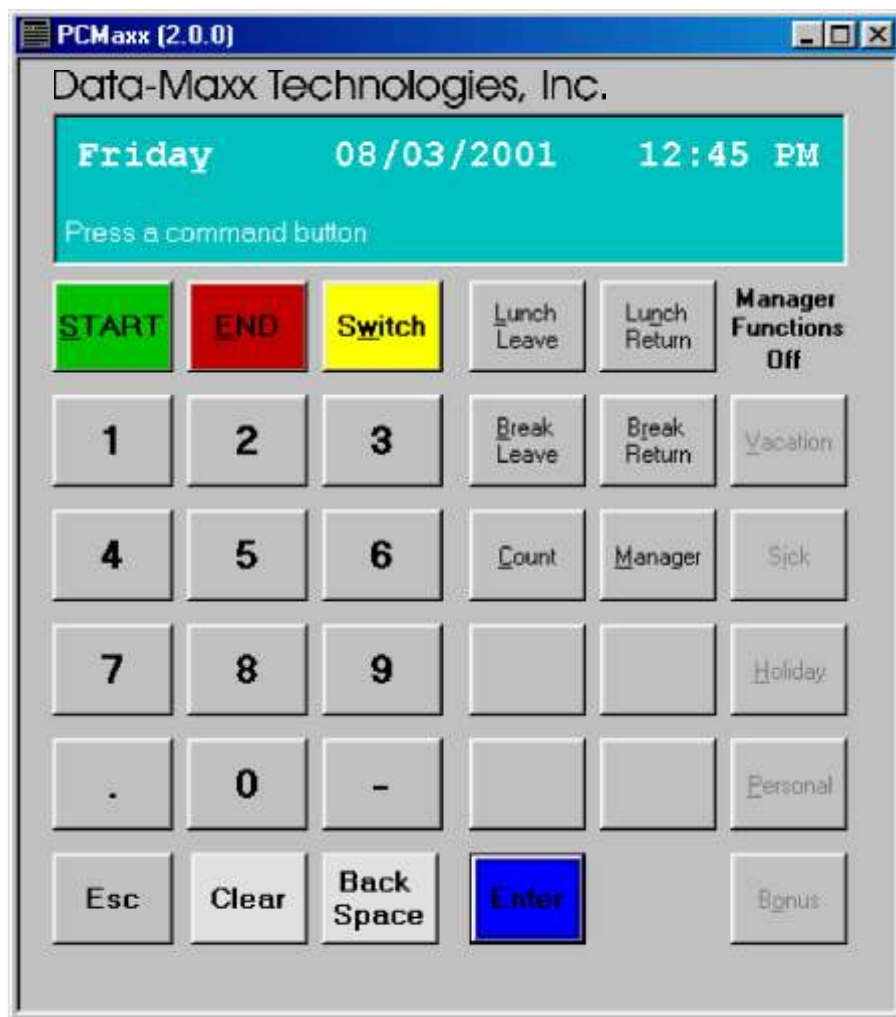

PCMaxx™

Track, Manage Control Employee Time

PCMaxx is a PC-based data collection solution that accurately gathers time and labor data from your company's workforce. Using existing employee workstations and/or standalone kiosks, PCMaxx automates the tracking of hours accumulated by employees, departments, jobs, tasks or work orders on site or in remote locations.

PCMaxx allows you to manage critical tasks such as payroll, job and task tracking, and billing fee justifications. All the reports that you need for analysis and day-to-day management are generated through the PCMaxx/Data-Maxx interface at the host PC. With PCMaxx, your company will benefit immediately from:

- No more manual timekeeping
- Reduced payroll preparation time
- Greater employee accountability
- Increased job control
- Minimal time sheet errors
- Informed decision making
- Easy installation and implementation
- A fast learning curve, and more.

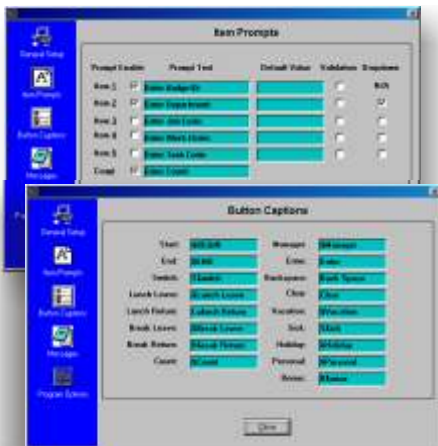

Rich in Features and Flexibility

PCMaxx provides standard features and functionality that are usually found only in more sophisticated time clock hardware. PCMaxx allows you to:

- Customize prompts, system messages, and user interface configuration
- Choose from multiple methods of collecting data
- Setup default entry options at workstations to eliminate repetitive data entry
- Choose job and department codes from drop down menus.
- Give employees access to their own time card reports
- Intelligently prompt users for information specific to their work environment
- Add missed punches, vacation, sick, holiday, personal or bonus time at the workstation or kiosk
- Transmit data via LAN or modem.

In addition, PCMaxx:

- Installs easily and is readily available on your desktop throughout the workday.
- Utilizes almost any PC to collect data on time, department and job activity.
- Collects up to five levels of information. Count information is also supported.

Multiple Data Collection Options

PCMaxx works with a variety of data collection devices which connect to your PC allowing you to choose which methods best suit your company's needs.

Technologies, Inc.

Choose from:

- Mouse or Keyboard
- Magnetic card reader
- Bar code wand
- CCD bar code scanner
- Fingerprint reader
- Touch screen overlay.

Flexible Setup

With PCMaxx, you can set up your physical data collection solution in the configuration that best suits your company's needs. PCMaxx lets you set up:

- Timekeeping at individual PC workstations
- Job tracking at individual workstations
- A central kiosk for group timekeeping
- Remote employee's workstations on laptops, etc.

Comprehensive Reporting

In PCMaxx workstation environments, employee data flows "real time" over your network letting you instantly see individual activity, departmental performance, and labor cost analysis by job. Off-site data is sent over a modem as a batch file at regularly scheduled times, or can be polled on demand.

With Data-Maxx, you can add "pay" or "bill" rates to employees, departments or jobs to easily provide reports for cost justification or analysis. Also, run management reports at any time, such as Who's In, Who's Not In, Exceptions, Approaching Overtime, Schedule Variance, Job Detail and Summary, Department Detail and Summary, and more.

Historical data is readily available in Data-Maxx so all reports can be run for a

quarter-by-quarter analysis. It is easy to obtain an employee's total work record or cost of a project or task over its life.

With support for over 100 payroll software packages, Data-Maxx lets you export your data to your payroll software or service bureau eliminating manual data entry and preparation.

System Requirements

Hardware Requirements: PCMaxx is a 32-bit application that requires a Pentium PC with minimum 16MB Ram, 15MB free hard drive space, and Windows XP or higher

Optional Equipment: PCMaxx integrates with optional touch screen, fingerprint recognition systems, CCD scanners and wedge readers, mouse or keyboard.

Workstation: LAN or modem is required for data transmission.

Kiosk TimeClock Station: LAN or modem communication with the host PC.

Host PC: Data-Maxx Database Software is required on host PC and is sold separately.
